Mr. Hubert Lambert,
State Engineer
Saptiol Building S.L.C.

Dear Mr. Lambert:

On March 9th of this year in re Water Rights in Alvey Wash, Garfield County - I sent you a letter on behalf of Paul Steed and Thurman Spencer setting forth the names of two individuals who could possibly be used as a water commissioner.

I am now informed over the phone, by Mr. Paul Steed, that no one has been appointed; that he is not getting his water as set up in the proposed determination; that the upper users are depriving him of the water by taking the water upstream through the use of dams placed in the wash - and this appears to be the situation because of no supervision or distribution.

He advises that Mr. Stoker was on the ground some short time after our meeting at Panguitch, and laid out or designated places for points of diversion or measuring devices to be installed, but that no-one takes the slightest attention looking toward installation of measuring devices or using a point of diversion.

We have the same trouble with the situation that Thurman Spencer is not getting his water which heretofore has been conveyed through a ditch used jointly with himself and Spencer - this for the reason that Leo Wilson will not permit the use of such ditch.

Would it be possible to have some action taken that would look toward the appointment of a commissioner to check on the distribution of water? It would be greatly appreciated if this will be done. Also I would appreciate some advise as to the status of the entire matter as of now.

Very truly yours,

Sam Cline.

CC: Mr. Gerald W. Stoker
